PROFILE

Enterprise architect and digital transformation leader with extensive progressive IT experience and an MBA. Currently shaping solution architecture for the UK's independent energy regulator, delivering secure, scalable platforms serving 3M+ users across critical national infrastructure. Published researcher in energy-sector enterprise architecture, technical infrastructure for human rights documentation, and comparative regulatory analysis. Proven record leading architecture across 18 government projects (2021–2026) spanning application, data, and infrastructure domains.

EXPERIENCE

Senior Solutions Architect

[Ofgem — Office of Gas and Electricity Markets](#)

Aug 2021 – Present

London, UK · Digital, Data, Security & Sustainability Directorate

- Designed and assured HLD/LLD architectures for enterprise data platform (Synapse), AI-driven social listening, secure inter-departmental file transfer (DWP-Ofgem SFTE), and Power BI external sharing — all through TDA governance to production.
- Led technical evaluation, SSO integration, and security assurance for Vivup benefits platform, 8x8/Crezovi telephony, and Digital Mail/Hybrid Mail digitisation across multiple procurement cycles.
- Drove go-live architecture reviews including Power BI Publish to Web (GO decision Mar 2026) and business continuity platform (Castellan/Riskconnect), balancing security, cost, and operational readiness.
- Delivered end-to-end BA on SharePoint Online migration, Teams provisioning automation, service catalogue redesign, and intranet rebuild — producing stakeholder-accepted designs and BAU transition docs.
- Contributed data ethics and AI governance assessments; provided architectural input to procurement ensuring value across £150M+ programme budgets.

Project Manager — IT

[Nelson Mandela Children's Hospital](#)

Jun 2019 – Jul 2020

Johannesburg, South Africa

Managed healthcare IT project delivery: scheduling, risk, change management, procurement, and vendor oversight for paediatric hospital systems.

Business Analyst

[DVT \(placed at Telkom SA\)](#)

Aug 2015 – May 2019

Delivered solutions for PwC, Vodacom, and Multichoice. Created user workflows, story maps, and led innovation onboarding across enterprise clients.

Earlier Career

Progressive technical roles across defence (Denel), broadcast media (ITV), enterprise storage (3Par/HP), telecommunications (Mweb), and academic IT (Academy of Science, Canberra). Spanning the UK, South Africa, and Australia.

KEY DOMAINS

Energy Regulation

UK critical national infrastructure · 28M+ households

Government Digital

GDS-aligned architecture · 18 projects delivered

Healthcare IT

Paediatric hospital systems · clinical infrastructure

Telecommunications

Enterprise platforms · Vodacom, Telkom SA, Mweb

Defence & Broadcast

Denel, ITV · secure systems & media infrastructure
