

HENRI LE RICHE

SENIOR SOLUTIONS ARCHITECT

London, United Kingdom
henri.leriche@outlook.com
+44 7376 783718
IEEE SENIOR MEMBER · MBA

PROFESSIONAL SUMMARY

Enterprise architect and digital transformation leader with extensive progressive experience spanning solution architecture, business analysis, project management, and technical delivery across government, defence, healthcare, telecommunications, and media sectors. Currently serving as Senior Solutions Architect at the Office of Gas and Electricity Markets (Ofgem), the UK's independent energy regulator, where I design and assure scalable, secure digital infrastructure supporting critical energy systems serving 3M+ direct platform users across 28M+ households.

Architect of record on 18 projects since 2021, spanning end-to-end solution design, enterprise data platform strategy, AI-enabled tooling, inter-departmental secure file transfer, and business continuity digitisation. Published researcher with peer-accessible papers on energy-sector enterprise architecture, human rights documentation infrastructure, and comparative regulatory analysis. IEEE Senior Member. MBA-qualified with deep expertise in TOGAF, ArchiMate, Microsoft Azure, GDS Standards, and UK Government security frameworks.

Strengths include translating complex business requirements into practical, assured solution architectures; bridging technical detail with strategic intent for senior stakeholders; and maintaining architectural coherence across multi-project portfolios. People-oriented leader who values collaborative, respectful working environments.

PROFESSIONAL EXPERIENCE

Senior Solutions Architect

Office of Gas and Electricity Markets (Ofgem)

August 2021 - Present

Grade Level 2A · Full-Time Permanent · Digital, Data, Security and Sustainability (DDSS) Directorate

Ofgem is the United Kingdom's independent energy regulator responsible for gas and electricity markets. I serve as technical architect within the DDSS division, accountable for solution architecture design, technical governance, and stakeholder engagement across the organisation.

- Solution architecture design, documentation, and peer review on assigned projects (30% of role)
- Technical ownership and stakeholder engagement with Heads of Delivery, Product Owners, Enterprise Architects, Programme Managers, and vendors (30%)
- Collaboration with delivery teams ensuring technical feasibility, alignment, and coherence across projects (20%)
- Governance and assurance of standards and compliance (GDS, ISO 27001, GDPR); continuous improvement including AI and data platform governance (20%)

KEY SOLUTION ARCHITECTURE PROJECTS (2024-2026)

Synapse Replacement / Enterprise Data Platform

Feb-Jul 2026

Solution Architect

Led HLD review, current-state and requirements analysis, platform sizing, technical capability comparisons, and options/business-case material for replacing or evolving the Synapse-based enterprise data platform. Delivered handover package enabling Project 533 completion.

Power BI External Sharing with DESNZ

Dec 2025-Apr 2026

Solution Architect

Ran discovery workshops, requirements and access governance, licensing/cost options analysis, managed group and approval discussions, and architecture/TDA support for controlled external sharing of Power BI reports with the Department for Energy Security and Net Zero.

Enable Power BI Publish to Web

Sep 2025-Mar 2026

Architecture/Assurance Contributor

Participated in security, privacy, and operational-readiness review for establishing a governed process for publicly publishing selected Power BI reports. GO decision recorded at go-live review on 12 March 2026.

AI-Driven Social Listening Tool

Feb-Jul 2025

Solution Architect

Delivered solution architecture, architecture content for TDA, governance and security coordination, and technical feasibility assessment for an AI-powered monitoring and sentiment analysis tool for energy-sector consumer insight. Concept approved at TDA288; supplier onboarding and further design work identified.

8x8 and Crezovi Integration

May-Jun 2025

Solution Architect/Assurance Contributor

Managed supplier technical questions covering data-flow, identity, security, retention, cost, and exit considerations for telephony platform integration. Facilitated Vanta Trust Center assurance access for supplier due diligence.

SOLUTION ARCHITECTURE PROJECTS (CONTINUED)

DWP-Ofgem Secure File Transfer / SFTE

Jun 2024-Jul 2025

[Solution Architecture & Technical Coordination](#)

Designed options and security assessment, storage-account design notes, testing coordination, and network whitelist information for secure bi-directional file exchange supporting DWP and Ofgem processes. Successful bi-directional end-to-end test recorded 9-10 April 2025.

Vivup Employee Benefits Platform

Aug 2024-Aug 2025

[Technical Evaluation & Solution Support](#)

Led tender/presentation evaluation, security and SSO considerations, joiners/leavers process questions, logging and monitoring discussions, and implementation support for procurement, onboarding, and assurance of the employee benefits platform.

Digital Mail / Inbound Digitisation / Hybrid Mail

Feb-Oct 2024

[Business & Solution Support](#)

Managed supplier workshops, SSO requirement and change request, service definition review, TDA material, and technical/operational coordination for SPS-supported inbound physical mail digitisation and outbound hybrid mail. Delivered baseline service definition and approved SSO change request.

AI Transcription / Data Ethics Assessment

Jan 2025

[Governance Contributor](#)

Worked with assessment covering data sources, processing, transparency, accountability, fairness, risks, and harms for AI transcription processing.

KEY BUSINESS ANALYSIS PROJECTS (2021-2024)

Business Continuity / Castellan / Riskonnect

Jun 2023-Apr 2024

[Business Analyst → Architecture](#)

Captured objectives, scope, SSO/break-glass and API discussions, service-readiness input, and TDA/process clarification for digitising Ofgem business continuity and resilience processes. Go-with-caveats readiness decision recorded February 2024.

The Wire Rebuild (Intranet)

Jun-Jul 2023

[Business Analyst](#)

Coordinated site-owner migration planning, content and archive queries, project-plan review, and action follow-up for the rebuild and migration of Ofgem's intranet content and profession/community sites.

Huddle Secure Collaboration Assessment

May 2023

[Business Analyst](#)

Provided latest report, product identity clarification, indicative licensing research, vendor capability and security material handover for assessment of secure external document collaboration.

Service Excellence / Service Desk

2023

[Business Analyst](#)

Delivered service catalogue scoping, process-design support, IT specialist support, and documentation contributions for improving service quality, customer journey, efficiency, and service-desk processes.

SharePoint to Cloud / Teams Provisioning

2023

[Business Analyst](#)

Managed security acceptance support, approval coordination, capture of PDF/ZIP/email movements, process flows, developer and network handover, and controlled adoption for Teams provisioning capability and migration-process automation.

SharePoint Migration (2013 → Online)

2023

[Business Analyst](#)

Served as business point of contact for migration from SharePoint 2013 to SharePoint Online, managing migration communications, user engagement, cross-directorate coordination, and feedback capture. Migration completed April 2023.

New Software Requests Standardisation

2022-2023

[Business Analyst](#)

Led stakeholder discovery, end-to-end process design, live-request testing, ownership and routing, integration with Confluence/service desk/Ivanti, KPI support, and edge-case refinement. Process designed, tested, and accepted as a stakeholder template.

Business-as-Usual Digital Requests

2022-2023

[Business Analyst](#)

Managed request routing, task assignment, support to TDA/Service Delivery/Communications, gap identification, and stakeholder updates across ongoing information, software, service, and support requests.

PRIOR EXPERIENCE

Technologist / IT Consultant

Self-employed / Freelance — United Kingdom

Jul 2020 - Aug 2021

- Completed advanced cybersecurity training while providing technology consultancy services
- Analysed market trends and utilised resource management software to craft cost-effective solutions
- Streamlined business processes and reduced operating costs through technology optimisation
- Contributed to state-of-the-art equipment mapping project for Apple Maps

Project Manager — IT

Nelson Mandela Children's Hospital — Johannesburg, South Africa

Jun 2019 - Jul 2020

- Managed IT planning and implementation of small to medium healthcare technology projects across critical hospital infrastructure
- Ensured technical decisions based on key considerations of cost, quality, and risk
- Developed and maintained stakeholder relationships through communication and negotiation
- Managed project deliverables including scheduling, risk management, change management, and procurement
- Supervised vendor relationships to ensure success of technology implementations

Business Analyst

DVT (placed at Telkom South Africa) — South Africa

Aug 2015 - May 2019

- Delivered technology solutions for major clients including PwC, Vodacom, and Multichoice
- Created user workflows and user story maps to define user experience and product requirements
- Led innovation team onboarding and staff development initiatives
- Established and nurtured client-facing relationships to drive solution development

Earlier Career

Progressive technical roles across defence (Denel), broadcast media (ITV), enterprise storage (3Par/HP), telecommunications (Mweb), academic IT (Academy of Science, Canberra), and technology services (OKI Europe, OnDemand, CIC Technology). Delivered technical support, systems engineering, IT administration, and helpdesk management across the UK, South Africa, and Australia.

CAREER PROGRESSION: Technical Support → Systems Engineer → IT Coordinator → BA → PM → Senior SA

PUBLICATIONS

Digital Infrastructure Standards for Energy Regulation: Enterprise Architecture in UK Government Service

Zenodo, 2025 · DOI: [10.5281/zenodo.17750625](https://doi.org/10.5281/zenodo.17750625)

Paper examining enterprise architecture standards within UK energy regulation, documenting infrastructure design principles, government digital service compliance, and scalable platform governance.

Technical Infrastructure for Human Rights Documentation: Bridging Enterprise Architecture and Evidence-Based Research

Zenodo, 2025 · DOI: [10.5281/zenodo.17750868](https://doi.org/10.5281/zenodo.17750868)

Paper exploring the intersection of enterprise architecture methodology and human rights documentation, presenting technical infrastructure frameworks for evidence-based research.

Comparative UK/US Regulatory Analysis

SSRN, 2026 · CC BY licence

Comparative analysis of UK and US energy regulatory frameworks.
